THE BENEFITS OF KEEPSTOCK® RFID

Re-order supplies easily. Create orders by simply putting the RFID card for the article you need into a slot on the RFID board. This effectively reduces manual errors and saves lots of time in your ordering process.

Streamline your purchasing process. After putting the RFID card on the RFID board, the information is automatically transmitted to Fabory. An order is created in Fabory's SAP system and the goods are on their way. Of course you'll receive a confirmation of your order.

Minimize time spent. All it takes is placing the RFID card for the product that needs replenishment on the board and the order is automatically placed. Insight in your purchase order history allows you to make quick and well-informed decisions about your inventory stock levels.

WHAT ARE YOUR SAVINGS?

KeepStock RFID will save you time and money in the following areas:

- Inventory management → Just place the RFID card on the board when stock needs replenishing, saving time and lowering error rates.
- Order process → Automatically re-order all your Fabory products. Quick & easy.
- Administration → Access your order status and history online, enabling you to optimize your stock levels.

FABORY SUPPORT

Fabory will assist you with implementation and training to use the RFID technology. We'll supply the RFID cards and board. No special software is needed. We'll provide you with a personal link to our "Scan Monitor". This is a dashboard that gives a clear insight into your order history and inventory usage through traffic light colors that indicate the status of your current stock level. Optimize your stock levels and take costs out of your business.

HOW TO GET KEEPSTOCK® RFID

1. Contact your Fabory contact person for more information on how KeepStock RFID can save you time and money.
2. Fabory's KeepStock specialists will assess your specific inventory needs with you and help choose the best solution for your specific situation.
3. Fabory will provide ongoing support to help ensure long-term success as your business and product needs change.
